

Campaign Checklist

The 17-step campaign roadmap — Build, Test, Scale

HOW TO READ THIS CHECKLIST

[MM] = Media Mavens · [CB] = ClickBank. Items tagged [MM] or [CB] apply only to that affiliate network — items with no tag apply to both.

One-time setup = done once ever, during initial setup. **Once per brand domain** = done once for each brand domain you use. Everything else repeats for every new campaign.

Phase 1 — Build

1 Orient One-time setup

Start with the 7 Pillars and the three-phase path (Build → Test → Scale).

☐ Complete: Orient One-time setup

2 Know the gates One-time setup

Each phase has an exit gate; know the testing budgets before you start; compliance approval is required before any ad creative or landing page creative runs.

☐ Complete: Know the gates One-time setup

3 Choose your network

Media Mavens or ClickBank. This choice changes how you'll build your landing page assets, Flexy website, MetricMover split test, and DIYTrax setup.

☐ Complete: Choose your network

4 Offer Selection

The affiliate link is required later for the DIYTrax Offer Pages tab when you complete your DIYTrax setup.

☐ Review the presell page for the offer: the advertorial [MM] or the VSL [CB].

☐ Select your offer and copy your affiliate link.

5 Finalize your angles

5 angles, extracted from the advertorial/VSL and customer avatar research; done first — your native ad assets and landing page assets build on them.

☐ Complete: Finalize your angles

6 Create native ad assets

~10 ad headlines + 1 description + ad image.

☐ Complete: Create native ad assets

7 Create landing page assets

5 LP headlines + 5 hero shots.

☐ [CB] Capture the VSL/transcript, then generate base-page copy plus a control headline/subheadline and hero shot via the Bridge Page Copy Bot.

☐ [MM] Landing-page copy comes from the pre-built advertorial (optimized later when you set up your website in Flexy).

8 Submit for compliance review

Submit all creatives. Compliance blocks publishing/go-live only; you can keep building your DIYTrax campaign and Flexy website while you wait.

☐ Complete: Submit for compliance review

9 Create your DIYTrax campaign

☐ Create the campaign in DIYTrax.

☐ Fill in the Basic Info tab (and save).

☐ One-time global setup: copy the T2 landing-page URL from the Links & Pixels tab in your DIYTrax campaign and paste it into Flexy Custom Values. One-time setup

10 Set up your website in Flexy

☐ Clone the site → create a subdomain → connect the subdomain to the cloned site.

Once per brand domain

☐ [MM] Clone the advertorial page for your offer.

☐ [CB] Clone a template and format it to be ready for your base-page copy.

☐ Optimize the page for desktop and mobile: font size/style, headline/subheadline/hero-shot element spacing.

11 Build your landing page split test in MetricMover

Requires your formatted Flexy page and your compliance-approved assets.

- ☐ [CB] Fill the page with your approved base-page copy, control headline/subheadline, and hero shot.
- ☐ Create a blank MetricMover page with a custom code box in Flexy.
- ☐ Build the 5×5 (25 combinations) in MetricMover.
- ☐ Paste the MetricMover embed code into the Flexy "MM" page and publish.

12 Complete your DIYTrax setup

- ☐ Landing Pages tab: import the MetricMover (trax-import) CSV; all active, equal share; auto-optimization off.
- ☐ Offer Pages tab: add your offer link with your affiliate ID at 100%.
- ☐ [CB] Enable IPN so sales are recorded.

13 Configure Caterpillar & go live

- ☐ Configure the Traffic Source tab for Caterpillar: select product, create subcampaigns, create ads.
- ☐ QA before going live: all DIYTrax settings, full-funnel click-through using the campaign URL, all ads in approved status.

Phase 2 — Test

14 Round 1 — headline test

Prepare Round 2 image assets while Round 1 runs.

- ☐ Complete: Round 1 — headline test

15 Round 2 — image (visual creative) test

- ☐ Complete: Round 2 — image (visual creative) test

16 Round 3 — placement test

- ☐ Complete: Round 3 — placement test

Phase 3 — Scale

17 Scale

Only after Rounds 1–3 are complete and the campaign is profitable. Order: increase budget on the winning placement → expand to new placements/publishers (Grasshopper, Crane) → Master Publisher after 14+ consecutive profitable days.

☐ Complete: Scale
