

Campaign Checklist

The 16-step campaign roadmap

Note: The order of this checklist may differ from the order of the videos in the Blitz. The checklist is organized to put your initial focus where it matters most — your marketing assets.

HOW TO READ THIS CHECKLIST

[MM] = Media Mavens · **[CB]** = ClickBank. Items tagged [MM] or [CB] apply only to that affiliate network — items with no tag apply to both.

One-time setup = done once ever, during initial setup. **Once per brand domain** = done once for each brand domain you use. Everything else repeats for every new campaign.

1 Orient One-time setup

Familiarize yourself with "Finding Your Edge" and "The 21 Day Blitz"

☐ Orient One-time setup

2 Understand the testing reality One-time setup

Each round of testing has its own budget and purpose. Moving from one round to the next is not automatic — it requires favorable results before you advance.

☐ Review Caterpillar Round 1/2/3 budget and testing guidelines One-time setup

3 Choose your network

Media Mavens or ClickBank. This choice changes how you'll build your landing page assets, Flexy website, MetricMover split test, and DIYTrax setup.

☐ Choose your network

4 Offer Selection

The affiliate link is required later for the DIYTrax Offer Pages tab when you complete your DIYTrax setup.

☐ Review the presell page for the offer: the advertorial [MM] or the VSL [CB].

☐ Select your offer and copy your affiliate link.

5 Finalize your angles

5 angles, extracted from the advertorial/VSL and customer avatar research; done first — your native ad assets and landing page assets build on them.

☐ Finalize your angles

6 Create native ad assets

~10 ad headlines + 1 description + ad image.

- ☐ Create native ad assets

7 Create landing page assets

5 LP headlines + 5 hero shots.

- ☐ [CB] Capture the VSL/transcript, then generate base-page copy plus a control headline/subheadline and hero shot via the Bridge Page Copy Bot.
- ☐ [MM] Landing-page copy comes from the pre-built advertorial (optimized later when you set up your website in Flexy).

8 Submit for compliance review

Submit all creatives. Compliance blocks publishing/go-live only; you can keep building your DIYTrax campaign and Flexy website while you wait.

- ☐ Submit for compliance review

9 Create your DIYTrax campaign

- ☐ Create the campaign in DIYTrax and fill in the Basic Info tab (and save).
- ☐ One-time global setup: copy the T2 landing-page URL from the Links & Pixels tab in your DIYTrax campaign and paste it into Flexy Custom Values. One-time setup

10 Set up your website in Flexy

- ☐ Clone the site → create a subdomain → connect the subdomain to the cloned site.
Once per brand domain
- ☐ [MM] Clone the advertorial page for your offer.
- ☐ [CB] Clone a template and format it to be ready for your base-page copy.
- ☐ Optimize the page for desktop and mobile: font size/style, headline/subheadline/hero-shot element spacing.

11 Build your landing page split test in MetricMover

Requires your formatted Flexy page and your compliance-approved assets.

- ☐ [CB] Fill the page with your approved base-page copy, control headline/subheadline, and hero shot.
- ☐ Create a blank MetricMover page with a custom code box in Flexy.
- ☐ Build the 5×5 (25 combinations) in MetricMover.
- ☐ Paste the MetricMover embed code into the Flexy "MM" page and publish.

12 Complete your DIYTrax setup

- ☐ Landing Pages tab: import the MetricMover (trax-import) CSV; all active, equal share; auto-optimization off.
- ☐ Offer Pages tab: add your offer link with your affiliate ID at 100%.
- ☐ [CB] Enable IPN so sales are recorded.

13 Configure Caterpillar & go live

- ☐ Configure the Traffic Source tab for Caterpillar: select product, create subcampaigns, create ads. (before creating ads, make sure campaign is "active" in Basic Settings tab, and subcampaigns are set to "off" until all ads are approved and you have completed the final QA)
- ☐ QA before going live: all DIYTrax settings, full-funnel click-through using the campaign URL, all ads in approved status.

14 Round 1 — headline test

- ☐ Round 1 — headline test

15 Round 2 — image test

- ☐ Round 2 — image test

16 Round 3 — placement test

- ☐ Round 3 — placement test
